Education

Brown University Providence, RI

Sc.B. in Computer Science and Economics | GPA: 3.87/4.0 | *Class of 2027*

- **Relevant Coursework:** Data Science, Deep Learning, Machine Learning, Computer Networks, Designs/Analysis of Algorithms, Intermediate Mathematical Microeconomics, Investments II, Financial Accounting

Experience

Software Engineer Intern Sep. 2026 – Present

InstaLILY AI

- Shipped LLM sales action cards to 36 reps at a $10B distributor, grounding every claim in ERP and Salsify data
- Moved client ERP sync to their AWS with zero downtime via 3 schema migrations and a Temporal/ECS cutover
- Designing a rep-feedback learning loop (reason-coded suppressions, Thompson-sampled ranking) for ∼50 pilot reps

Equity Capital Markets Summer Analyst (Technology) Jun. 2026 – Aug. 2026

JPMorgan Chase

- Staffed on 2 tech IPOs and 4 follow-on offerings, building valuation models and trading comps analyses
- Automated tracking of 30+ comparable companies across live deals using LLM tools (Rogo, internal JPM LLM)

Software Engineer Intern Jan. 2026 – Apr. 2026

Wlkthru

- Built WebRTC infra on a Mediasoup SFU with an FFmpeg pipeline recording 20+ calls/week
- Eliminated manual call notes with an AI summarizer that extracts structured data into external CRMs
- Implemented low-latency (<5s) live Spanish ↔ English audio translation pipeline for in-call communication

Projects & Extracurriculars

Beya: Small Business Assistance App | *Technical Development Lead* Sep. 2024 – Apr. 2025

- Led end-to-end development of a B2B mobile app for 20+ vendors, generating $22K+ ARR
- Built a serverless AWS Lambda payment backend processing Stripe webhooks for 100+ transactions
- Integrated Apple Tap-to-Pay for in-app contactless payments and supported official App Store release

PartSelect Agent | *Individual Contributor* May 2026

- Hit 100% tool-routing accuracy on 17 eval cases via a FastAPI agent over SQL/vector MCP servers
- Built a resumable Playwright scraper with anti-detection, deduplication, and crash recovery across 7,000+ parts
- Designed a dual-layer eval harness scoring 11 categories via deterministic routing checks and LLM-as-judge

Pitch Recognition and Note Detection From Sheet Music | *Researcher* Feb. 2025 – May 2025

- Built a sheet-music-to-MIDI pipeline: staff detection, notehead detection, and 4 CNNs for note type, clef and key
- Trained a 118K-param U-Net heatmap detector that raised held-out notehead F1 from 0.82 (morphology) to 0.999
- Evaluated on 6 held-out DoReMi songs (7.7K labelled noteheads): 94% pitch accuracy at 0.45 s/page on CPU

Awards & Publications

Publication | *The Journal of Applied Mathematics and Computation* Jun. 2023

- Modeled slime-mold networks via energy minimization to design lightweight, dragonfly-inspired drone wings
- Built a MATLAB gradient-flow optimizer over a $3N^2+3N+1$-node graph, solving sparse systems per RK4 step

Skills & Interests

Programming: Python, C++, JavaScript, Typescript, Swift, SQL
Frameworks & Libraries: FastAPI, React, Expo, TensorFlow, Playwright, Temporal
Cloud & Databases: AWS (ECS, Lambda), Firebase, MySQL, SQLite, ChromaDB
Languages: English, Chinese (Native proficiency)
Interests: Tennis, Personal Fitness, Short Fiction Writing, Card Games & Probability Theory
